Your Answers:

1

1 / 1 point Multiple choice

What type of phrase is "The Text Mining Course"?

☐ Verb Phrase (VP)

☒ Noun Phrase (NP)

☐ Adjective Phrase (AdjP)

☐ Prepositional Phrase (PP)

2

1 / 1 point Multiple choice

What is the difference between dependency parsing and constituent parsing?

- ☒ A dependency parser detects flat relations between adjectives, nouns and verbs, a constituency parser detects hierarchical relations such as noun phrases and verb phrases.
- ☐ A dependency parser detects hierarchical relations such as noun phrases and verb phrases, a constituency parser detects flat relations between adjectives, nouns and verbs.
- ☐ A dependency parser detects relations between morphemes, a constituency parser detects relations between parts-of-speech
- ☐ There is no difference

3 1 / 1 point Multiple choice

What are chunkers?

- ☐ Chunkers provide an efficient way identify compound nouns in languages such as English (where they are not written as one word, unlike Dutch and German), but no further syntactic information
- ☐ Chunkers provide the same information as a parser, but are more robust and have a lower precision
- ☒ Chunkers efficiently identify constituents but do not provide full sentence structure or syntactic dependencies
- ☐ Chunkers provide phrase structure trees efficiently, but they do not capture all syntactic structures

4 1 / 1 point Multiple choice

What is the lexical relation between 'lecture room' and 'university building'?

- ☒ meronymy
- ☐ synonymy
- ☐ hyponymy
- ☐ homophony

5

1 / 1 point Multiple choice

Syntactic parsers and chunkers are natural language processing modules used for which of the following?

☒ Syntax☐ Morphology☐ Pragmatics☐ Semantics

6

1 / 1 point Multiple choice

What is the primary difference between semantics and pragmatics in linguistics?

☒ Semantics deals with the literal meaning of words, while pragmatics focuses on how context influences meaning☐ Semantics is related to word order, while pragmatics deals with syntax rules☐ Semantics focuses on language evolution, while pragmatics is concerned with language in isolation☐ Semantics is concerned with sentence structure, while pragmatics is about sentence correctness

7

1 / 1 point Multiple choice

Which of the following is an example of a morphological process?

☒ Adding a prefix to a word to alter its meaning☐ Using context to determine word meaning☐ Applying tone or stress to modify word meaning☐ Changing word order to form a question

8

1 / 1 point Multiple choice

Which of the following processes involve changes to a word's grammatical features, such as tense or number?

☐ All of the above

☐ Compounding

☒ Inflection

☐ Derivation
